

01 / Cover and scope

Self-authored sample. Keep this page label when comparing split outputs.

FILE PAGE 1 OF 8

Section: Cover and scope

This file mixes seven small text pages with one larger simulated scan.

Splitting changes page groups. It does not promise a strict byte limit.

Check each downloaded PDF, not only the combined ZIP size.

No names, accounts, payment details or customer documents are used.

02 / Reading checklist

Self-authored sample. Keep this page label when comparing split outputs.

FILE PAGE 2 OF 8

Section: Reading checklist

This file mixes seven small text pages with one larger simulated scan.

Splitting changes page groups. It does not promise a strict byte limit.

Check each downloaded PDF, not only the combined ZIP size.

No names, accounts, payment details or customer documents are used.

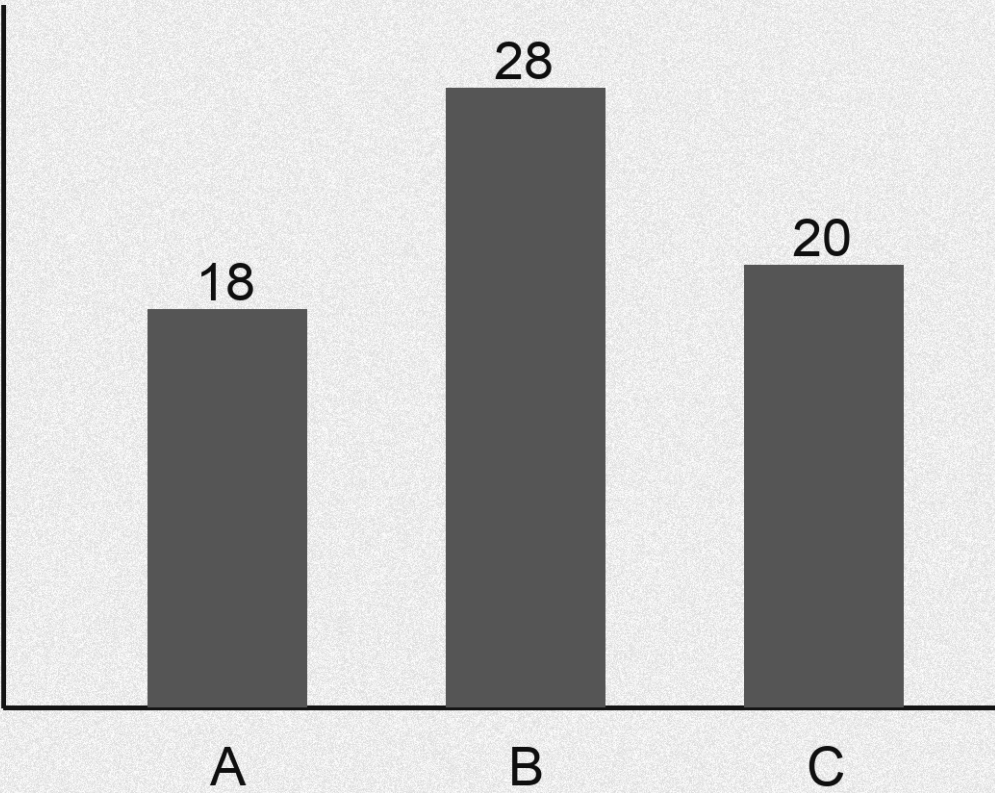

03 / Simulated scan chart

Self-authored sample. Keep this page label when comparing split outputs.

WILLOW / SCAN-LIKE CHART

Self-authored simulated scan; no personal data.

Values: A = 18, B = 28, C = 20. Unit: packets.

CHECK: $18 + 28 + 20 = 66$ packets

Background texture deliberately increases file size.

Do not infer OCR or compression quality from size alone.

04 / Formula note

Self-authored sample. Keep this page label when comparing split outputs.

FILE PAGE 4 OF 8

Section: Formula note

This file mixes seven small text pages with one larger simulated scan.

Splitting changes page groups. It does not promise a strict byte limit.

Check each downloaded PDF, not only the combined ZIP size.

No names, accounts, payment details or customer documents are used.

Formula check: total = $18 + 28 + 20 = 66$ packets.
